

Spatial-temporal clustering of yaws on Lihir Island, Papua New Guinea

S3 Table. Space-time permutation analysis adjusted for age and sex. This table lists the spatial-temporal yaws clusters identified by SaTScan using the space-time permutation method, which uses information about the timing and location of cases but not information about the underlying population at risk.

ID	Start Date	End Date	Number of Villages	Village IDs	Observed Cases	Expected Cases	P-Value
1	2010/8/2	2012/3/11	6	Tumbuapil, Lissel, Komat, Lataul, Kinami, Pangoh	104	44.14	9.0×10^{-13}
2	2005/4/11	2008/6/1	4	Lipuko, Putput_2, Matakues, Putput_1	177	103.80	5.3×10^{-9}
3	2012/5/7	2016/5/29	5	Kul, Kunaye_1, Kunaye_2, Londolovit, Zuen	240	159.64	2.5×10^{-7}
