

Figure S1

Figure S1: Dose response graph for Zymosan and Curdlan. Concentrations of Zymosan and Curdlan used in the experiments in the manuscript were chosen on the basis of IL -23 secretion. Upper bar graphs represent the levels of IL -12 and IL-23 secreted by DCs in response to various concentrations of Zymosan and Curdlan. Lower graph represents the level of IL-17 secreted by T cells cultured with various concentrations of Zymosan and Curdlan primed DCs.
