

Table S2. Susceptibility of 20 MSSA strains to SNH and oxacillin

Antimicrobial agent	MIC of reference strain ATCC 29213	MIC of 20 clinical isolates ^a (µg/mL)			Susceptible/total (% Susceptibility)
		Range	50%	90%	
SNH	32	16-32	32	32	NA ^b
OXA	0.5	0.25-0.5	0.5	0.5	20/20 (100%)

a. Origins of the 20 clinical isolates: Upper respiratory tract infection, 8 strains; pneumonia, 4 strains; skin and soft tissue wounds, 8 strains.

b. NA, not applicable
