

Table S5. Post-treatment Lyme disease-related condition presence by time of diagnosis (pre-Lyme disease and/or post-Lyme disease period), Lyme disease group*

Condition/EDC Category[†]	Person Counts by Condition Presence in Pre and/or Post Lyme Period			
	Count of selected ICD Codes	Persons with Condition Pre Lyme Only	Persons with Condition Pre and Post Lyme	Persons with Condition Post Lyme Only
Arthropathy	82	1,087	273	2,336
Debility and undue fatigue	3	3,918	1,192	6,612
Musculoskeletal signs and symptoms	41	5,198	1,826	8,753
Nonspecific signs and symptoms	8	588	127	1,300
Peripheral neuropathy, neuritis	72	1,685	669	3,301

* Lyme disease sample includes only those persons with a test order and antibiotic treatment within 30 days of the test order, a diagnosis and antibiotic treatment within 30 days of the diagnosis, or a diagnosis, test order and antibiotic treatment within 30 days. The Lyme disease sample includes only those with 18 consecutive months of enrollment, including a 6-month “clean period” of enrollment prior to Lyme disease episode in which they were neither diagnosed with nor tested for Lyme disease.

[†] A person may have claims in multiple EDC categories.
