

S2 Figure. Coverage distribution per gene. For each gene a graph is depicted, showing the mean coverage per exon over all samples (n=34). Error bars reflect ± 1 standard deviation. The commonly used threshold of 30X coverage is indicated in each graph with a black line.

Gene E

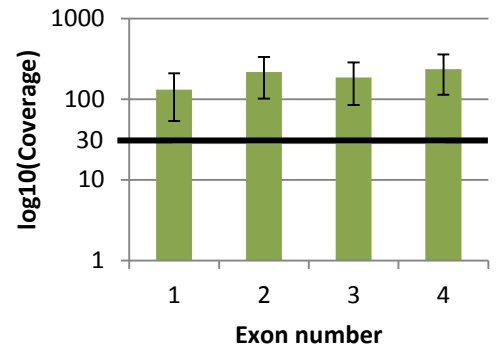

Gene F

Gene G

Gene H

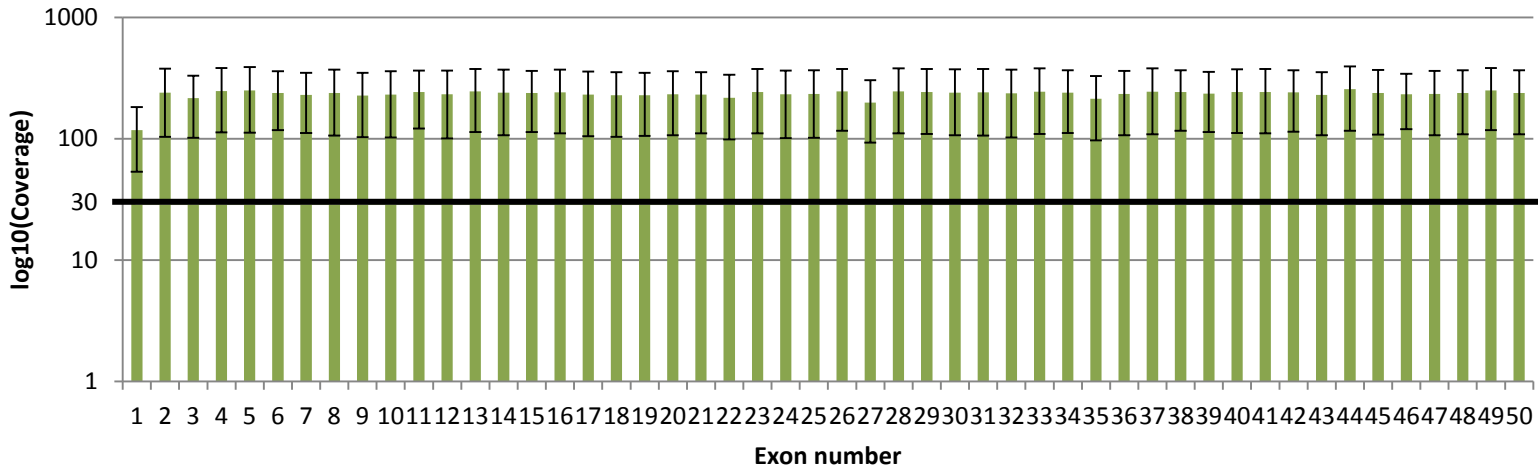

Gene I

Gene J

Gene K

Gene L

Gene M

Gene N

Gene O

Gene P

Gene Q

Gene R
