Kohlscheen, Wintterle et al., Supplementary Figure 11

The figure shows a box plot comparing log2 Mpl expression across three conditions: Ctrl, RC, and SAA. The x-axis represents the conditions, while the y-axis represents the log2 Mpl expression. The box plot for Ctrl shows a significant difference from the other conditions with p-values of less than 10^{-7} and 10^{-8}. The SAA condition shows no significant difference (n.s.).
