

Table 5 - Neonatal outcomes according to maternal exposure to periodontal disease (PD) and severe periodontal disease (SPD), Botucatu city, São Paulo state, Brazil, 2016-2017 (n = 138).

Outcome	Periodontal disease (PD)		Severe PD	
	OR ¹ (IC 95%)	<i>P</i>	OR ¹ (IC 95%)	<i>P</i>
Prematurity ²	1.65 (0.29-9.33)	0.571	5.62 (0.71-38.50)	0.102
Low birth weight ²	2.93 (0.46-2.36)	0.298	4.81(0.68-33.92)	0.115
Fetal growth restriction ²	4.61 (0.53-39.57)	0.163	11.53 (1.10-12.26)	0.041
Small for GA* ²	1.39 (0.52-3.69)	0.503	1.32(0.29-5.91)	0.711

¹ Reference category in the regression analysis was the absence of PD;

² corrected for maternal age (years), level of education, number of gestations, smoking, gestational diseases, hemorrhage and premature rupture of membrane; * GA = gestational age.
