Azithromycin + standard care vs. standard care

Furtado 2020

Heterogeneity: $I^2 = 0.00\%, H^2 = 1.00$

Test of $\theta_i = \theta_j; Q(0) = 0.00, p = .$

Azithromycin + HCQ + standard care vs. HCQ + standard care

Cavalcanti 2020c

Heterogeneity: $I^2 = 0.00\%, H^2 = 1.00$

Test of $\theta_i = \theta_j; Q(0) = 0.00, p = .$

Overall

Heterogeneity: $I^2 = 0.00\%, H^2 = 1.00$

Test of $\theta_i = \theta_j; Q(1) = 0.14, p = 0.71$

Test of group differences: $Q_b(1) = 0.14, p = 0.71$

Fixed-effects Mantel-Haenszel model
