Notes: \*\*\*  $p < 0.01$ , \*\*  $p < 0.05$ , \*  $p < 0.1$ . Robust t-statistics in parentheses with k-1 state dummies. LATE estimated using OLS regressions, showing unstandardized regression coefficient estimates. Two-sided tests. Trust in government institutions is a continuous scale ranging from 2 to 10 comprised of two 5-point Likert scaled items: (1) how much do you trust the U.S. Government to provide accurate information on COVID-19? and (2) how much do you trust the Coronavirus Taskforce to provide accurate information on COVID-19?
