S1 Fig. Development of a humanized mouse model (iPDX). Schematic showing the workflow and the time frame of humanized Pancreatic and Colorectal cancer iPDX mouse model establishment and analysis of T cell engraftment.
Pancreatic cancer
(Or)

Colon cancer

0.5 to 1M cells in 100μl matrigel

Injection of PBMCs (5M/200μl PBS)

Engraftment check

2-9 wks

2 wks

2-4 wks

Tumor and Blood Collection and Flow analysis
