

S1 Table. Correlations between perception and paranormal experiences for the primed group only. The Pearson's (r) and Spearman's Rho (r_s) correlations between the percentage of yes responses in each stimulus condition and SAE responses for primed participants.

Primed	SAE No Responses	Anomalous Responses	Paranormal Responses
Degraded Speech	$r = -.279, p = .135$	$r = .001, p = .994$	$r_s = .294, p = .114$
Human Speech	$r_s = .193, p = .307$	$r_s = .061, p = .748$	$r_s = -.144, p = .448$
EVP	$r = -.167, p = .377$	$r = .197, p = .298$	$r_s = -.122, p = .521$
Noise	$r_s = .052, p = .783$	$r_s = .075, p = .693$	$r_s = -.064, p = .738$
