S5 Fig. Spearman correlations of nadir CD4+ T cell count and three HIV reservoir measures performed from peripheral CD4+ T cells of 191 ART-suppressed people living with HIV: total DNA (A), unspliced RNA (B), and intact DNA (C).

A. Spearman $R = -0.26$, $p = 0.00023$

B. Spearman $R = -0.3$, $p = 1.5 \times 10^{-5}$

C. Spearman $R = -0.27$, $p = 0.00037$
