S9 Fig. Correlations between gene and protein expression for host genes that were associated with HIV usRNA (KCNJ2, GJB2). Spearman correlations between host gene (normalized counts) are shown in relation to protein expression from peripheral CD4+ T cells among a subset of 40 participants in the study.

A. 

B. 

[Graph showing correlations between KCNJ2 and Kir2.1, and GJB2 and Connexin 26 with their respective Spearman R values and p-values]
