

A) CA - Biplot axis 1-2

B) CA - Biplot axis 1-3

S3 Fig. Correspondence Analysis (CA) from the frequency dataset of *Apis* spp. proteins found in the mite gut in relation to its feeding condition during the past 24h. (A) Visualization of axis 1 and 2, (B) Visualization of axis 1 and 3. Mites fed on pupae and larvae shared a more similar bee protein profile between each other than mites fed on adults. The PBS fed group is also different from the three other groups.
