Synerion Sentinel Clock

Introducing the rugged time clock device, a robust solution engineered to withstand the harshest work environments. With its durable construction and weather-resistant casing, this time clock ensures reliable performance even in the toughest conditions. Its intuitive interface and user-friendly design make clocking in and out a breeze for employees. Whether in construction sites, field service work, manufacturing plants, or any outdoor settings, this rugged time clock device stands as a dependable companion.

Synerion Rugged clock

Why Synerion time clocks

IP 68 Rating

With an IP68 rating, the tablet is both dust-tight and water-resistant up to a certain depth, ensuring it remains functional even in demanding conditions

MIL-STD-810G Certification

This military-grade certification ensures the tablet's durability against extreme temperatures, vibrations, and other environmental factors

Glove Mode

A specialized mode allows the touchscreen to be used even while wearing gloves, making it ideal for industries where protective gear is essential

All in one mobile Device

- Punch in/out
- Track jobs
- Full featured device for time tracking in any conditions
