Unit:mm

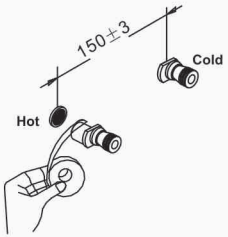

1 Open the valve and flush out impurities inside the pipeline.

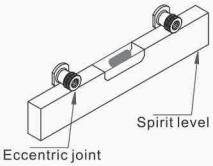

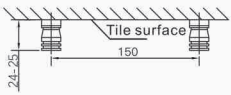

2 The S-type swivel elbow shall be wrapped with PTFE tape and installed into the wall-embedded water inlet.

O ring: 20x2.8mm

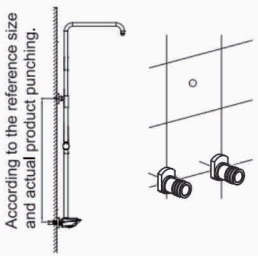

3 Adjust eccentric joint to level

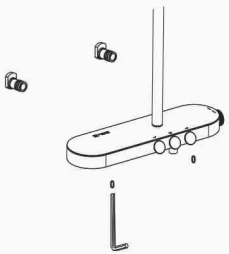

The eccentric joint is 24-25mm higher than the wall

4 Measure the hole spacing of the fixing base holes,insert plastic wall anchors, then fasten the mounting base onto the wall.

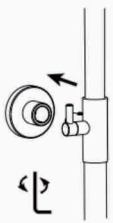

5 Mounting body

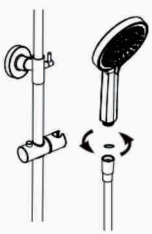

Install the main body of the faucet and the eccentric joint according to the figure and fix it with screws

6 Mount the shower riser rail to the fixing base, and tighten the screws respectively.

7 Install the hand shower, then clip it onto the shower holder.

8 Install the shower head and adjust it to a horizontal position.
