Polypouch Creates Custom Stand Up Pouch Designs For your Brand. If you have any specific requirements such as high strength, high moisture/oxygen barrier or anything else, Polypouch can customise the pouch materials as part of a bespoke stand up pouch order. If you are unsure of what type of pouch would be best for your products, then please don't hesitate to ask the [stand up pouch manufacturer](#) Polypouch for some samples.

You have many [stand up pouches](#) to choose from in their stock range such as aluminium stand up pouches, and kraft stand up bags, clear stand-up pouches, spout stand up bags, and many more. Polypouch discusses how pouches are ideal for products that will be positioned on retail shelving. To make it even better, you can choose custom stand up pouch printing.

The design team at Polypouch have created a wide range of printed stand up pouch designs to give you an idea of what is possible in the bespoke stand up pouch gallery.

If you have any specific requirements such as high strength, high moisture/oxygen barrier or anything else, then we can customise the pouch materials as part of a bespoke stand-up pouch order. If you are unsure of what type of pouch would be best for your products, then please don't hesitate to ask us for some samples.

The [stand-up pouch UK company](#) emphasises how their stand-up pouches help reduce our carbon footprints. The lightweight packaging such as pouches can be seen to reduce your company's carbon footprint during transportation.

Polypouch supply environmentally friendly [stands up pouches in the UK](#) which are gaining in popularity according to the stand-up pouch company. For example, for mail order items due to their ability to reduce postage costs when compared to plastic pots, tins and glass jars.

Polypouch is continually working alongside their industry partners to improve the overall environmentally friendly profile of pouch packaging. In their opinion, they think the flexible packaging industry should be working towards creating a circular economy for all forms of flexible packaging.

At Polypouch, they are very aware and conscious about the severe effect's plastic has on the environment, and it is becoming increasingly worse. According to recent research at Polypouch, when comparing pouches with glass jars, steel cans and plastic pots, pouches are proven to be more environmentally friendly.

So, not only are you purchasing a customisable pouch for your product, but you are also choosing a product, the stand-up pouches, which are fully recyclable.

Polypouch experimented on the efficiency of plastic pouches with that of three alternatives which were; plastic pots, glass jars and steel cans, all with the same function, and the resource efficiency indicator take into consideration three of the primary impacts packaging has on the environment – energy, material resources and waste.

The results indicated that the plastic stand up pouch is more resource-efficient compared to the three packaging alternatives. Even in a scenario where it was assumed that the laminated pouch was not recycled at all in comparison with the current recycling rate for the other packaging options.
