SKILLS

Javascript
Vue
Angular
NodeJS

CSS3
CSS Preprocessors
Vite / Webpack
HTML5

CI/CD
Ruby on Rails
Docker
Cypress

WORK EXPERIENCE

ProcessMaker

Sept 2021 – June 2024

Front End Developer – Full Time

- Being the front-end expert introducing Javascript Guidelines to our codebase, standards, and guidelines to follow on our open-source repos to deliver excellent code quality across the platform.
- Introduced a CI/CD pipeline using GitHub Actions. Checking if the code meets our standards and passes several checks before deploying it to our Kubernetes Cluster for testing and later, to our clients.
- Transitioning from Webpack / Vue CLI to Vite in our repos for faster build and deployment. Reduced build time by 70% and faster development experience.
- Migrating legacy code to testable units of work using the latest tools to be up to date and reducing complexity and risks.

Trustwell – Formerly known as FoodLogIQ (Durham, NC)

Oct 2018 – Sept 2021

Software Engineer – Full Time

- Brought in to reduce tech debt from our web app, implementing a POC to have a hybrid state app using AngularJS and Angular, using modern architecture, and reducing tech debt while upgrading components to the newest version of Angular.
- Introduced RFID capabilities to our mobile app by writing a Cordova plugin from scratch to parse RFID tags for a faster scan and receipt process for our suppliers.
- Implemented several POCs to reduce the tech debt we had and have a better component distribution system across our web applications using tools such as Storybook and NPM Packages.

Cisco (Morrisville, NC)

May 2018 – Sept 2018

Software Engineer – *Contract*

- Lead UI engineer in charge of inhouse proprietary tool, which serves to TAC Engineers from Cisco around the world.
- Fixed all our NodeJS applications and our angular app using Docker Compose for local development to share the same environment between other engineers and using Kubernetes for deployment.

Technical environment: HTML5, CSS3, Less, JavaScript, AngularJS 1.3, Docker, Kubernetes, MongoDB, NodeJS.

EmployUs (Cary, NC) – Acquired by Hireology
Software Engineer – *Full-time*

May 2017 – March 2018

<https://www.employus.com>

- Breaking expectations since day 1 delivering a mobile app in a month without prior knowledge using Ionic and Typescript.
- Maintaining legacy code using the MEAN Stack (Angular 2).
- Building a CORE system capable of handling numerous users at the same time without sweat using the MEAN Stack (Angular 5).
- Worked along with Product Manager and CEO to deliver an easy User Interface and User Experience for our web application.
- Assuming the role as UX / UI Designer, creating wireframes, delivering mockups, and coding the mockups into our web app.

Technical environment: HTML5, CSS3, SCSS, JavaScript, Node 4 and 8, Angular2+, Typescript, MongoDB, RESTful APIs, Jira, Confluence, Sketch, Photoshop.

Medthink Communications (Raleigh, NC)

Full Stack Developer – *Full-time*

Dec 2016 – May 2017

Front End Developer – *Contract*

June 2016 – Dec 2016

- Rebuilding and developed websites using NodeJS, Express, Jade, MySQL, jQuery, SCSS and Foundation as responsive framework.
- DevOps in charge of maintaining 20+ web servers.
- Development of Responsive HTML Email templates.
- QA in different environments and browsers.
- Created and improved our boilerplates for faster development.

Technical environment: HTML5, CSS3, SCSS, JavaScript, jQuery, AngularJS, Gulp, Grunt, JIRA, SOAP APIs, RESTful APIs, Jenkins, Docker, React, PHP, WordPress, .NET.
