SKILLS

Cloud: Mainly Google Cloud

Python, Java, PostgreSQL, NoSQL

Docker, Kubernetes

Django, Flask, RESTfull

EDUCATION

Computer engineering
Universidad Nacional de La Plata (UNLP)

2020-2025

LANGUAGES

Spanish (Native)

English (C1)

ABOUT ME

I'm an advance student in **Computer Engineering**. I'm a Google Cloud Associate Cloud Engineer certified and I've hands-on experience in building **Google Cloud** applications.

I began coding video games in Game Jams some time ago and desired to implement multiplayer features. Upon online research, I discovered Firestore. Since that pivotal moment, my enthusiasm for Cloud technologies and AI has been unwavering, propelling me into a continuous learning journey.

TECH TALES

Work Experience

At 2024

Programming Instructor - Object-Oriented Programming with C#

C#

Sicos Informatica - 6m - 2019

- Conducted comprehensive courses focused on **Unity Engine** game development using **C#** programming.

Freelance Desktop Application Developer

Java SQL

Self-Employed - 1yr - 2020

- Designed, developed, and deployed a proprietary desktop stock management application using **Java Swing** and **MySQL**.

Featured Projects

At 2024

NewVibe - AI-Powered News Analysis

ML/AI GCP NoSQL

- Web app that provides sentiment analysis for hundreds of financial news using **Google Cloud** AI services. Get insights of news in dashboards, take investment decisions and simulate portfolios.

CI/CD with Jenkins, GitOps: Deploying a Flask App to local Kubernetes

Jenkins AWS Flask

- Local automated deployment pipeline using **Jenkins**, **Kubernetes**, **Docker**, and **ArgoCD** for efficient continuous deployment on **AWS**.

Portfolio Website

Django Docker

- My full-stack personal portfolio website made with **Django** Python Framework, **Docker** and **PostgreSQL** database.
