

for Kids

Illustrated by
Anton Petrov

When God created the world, everything was good.
In fact, everything was perfect! God made everything just right.
He made lots of things that we see: birds and trees and clouds.
He also made things that we do not see: tiny creatures and warmth and wind.
We do not always see the fish that live deep, deep in the waters.
But they are there! God made them as part of His wonderful creation.
The water gives the fish a place to live. Water is important to all life!
God gives us water so plants and animals and people can live.
God gives us all that we need! In fact, He gives us more than we need.
