# Yojji. Journey through our experience

## Our philosophy

We've aligned ourselves so much with technology that we've started to think of users in terms of assets and clicks, instead of people.

## Our expertise

#### FULL STACK DEVELOPMENT

#### JAVASCRIPT

#### **PRODUCT DESIGN**

yojji.io

# What are the key benefits?

I. Deep dive

We dive into your business with a thorough analysis in mind to understand it from all sides.

## What are the key benefits?

II. Infinity support

Continuous delivery and support is our main goal. We will improve your business until you are 100% satisfied with the result.

## What are the key benefits?

**III.** Product for decades

We develop logical and well-structured as well as reliable digital applications that are easy to maintain.

## Business model

#### MVP

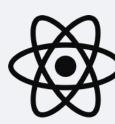

#### **DEDICATED TEAM**

#### SUPPORT

## Technologies

We develop software for a variety of platforms. Only wellrecognized and time-tested technologies to support any of your business goals.

Angular

React

JavaScript

Amazon Web Services

NestJS

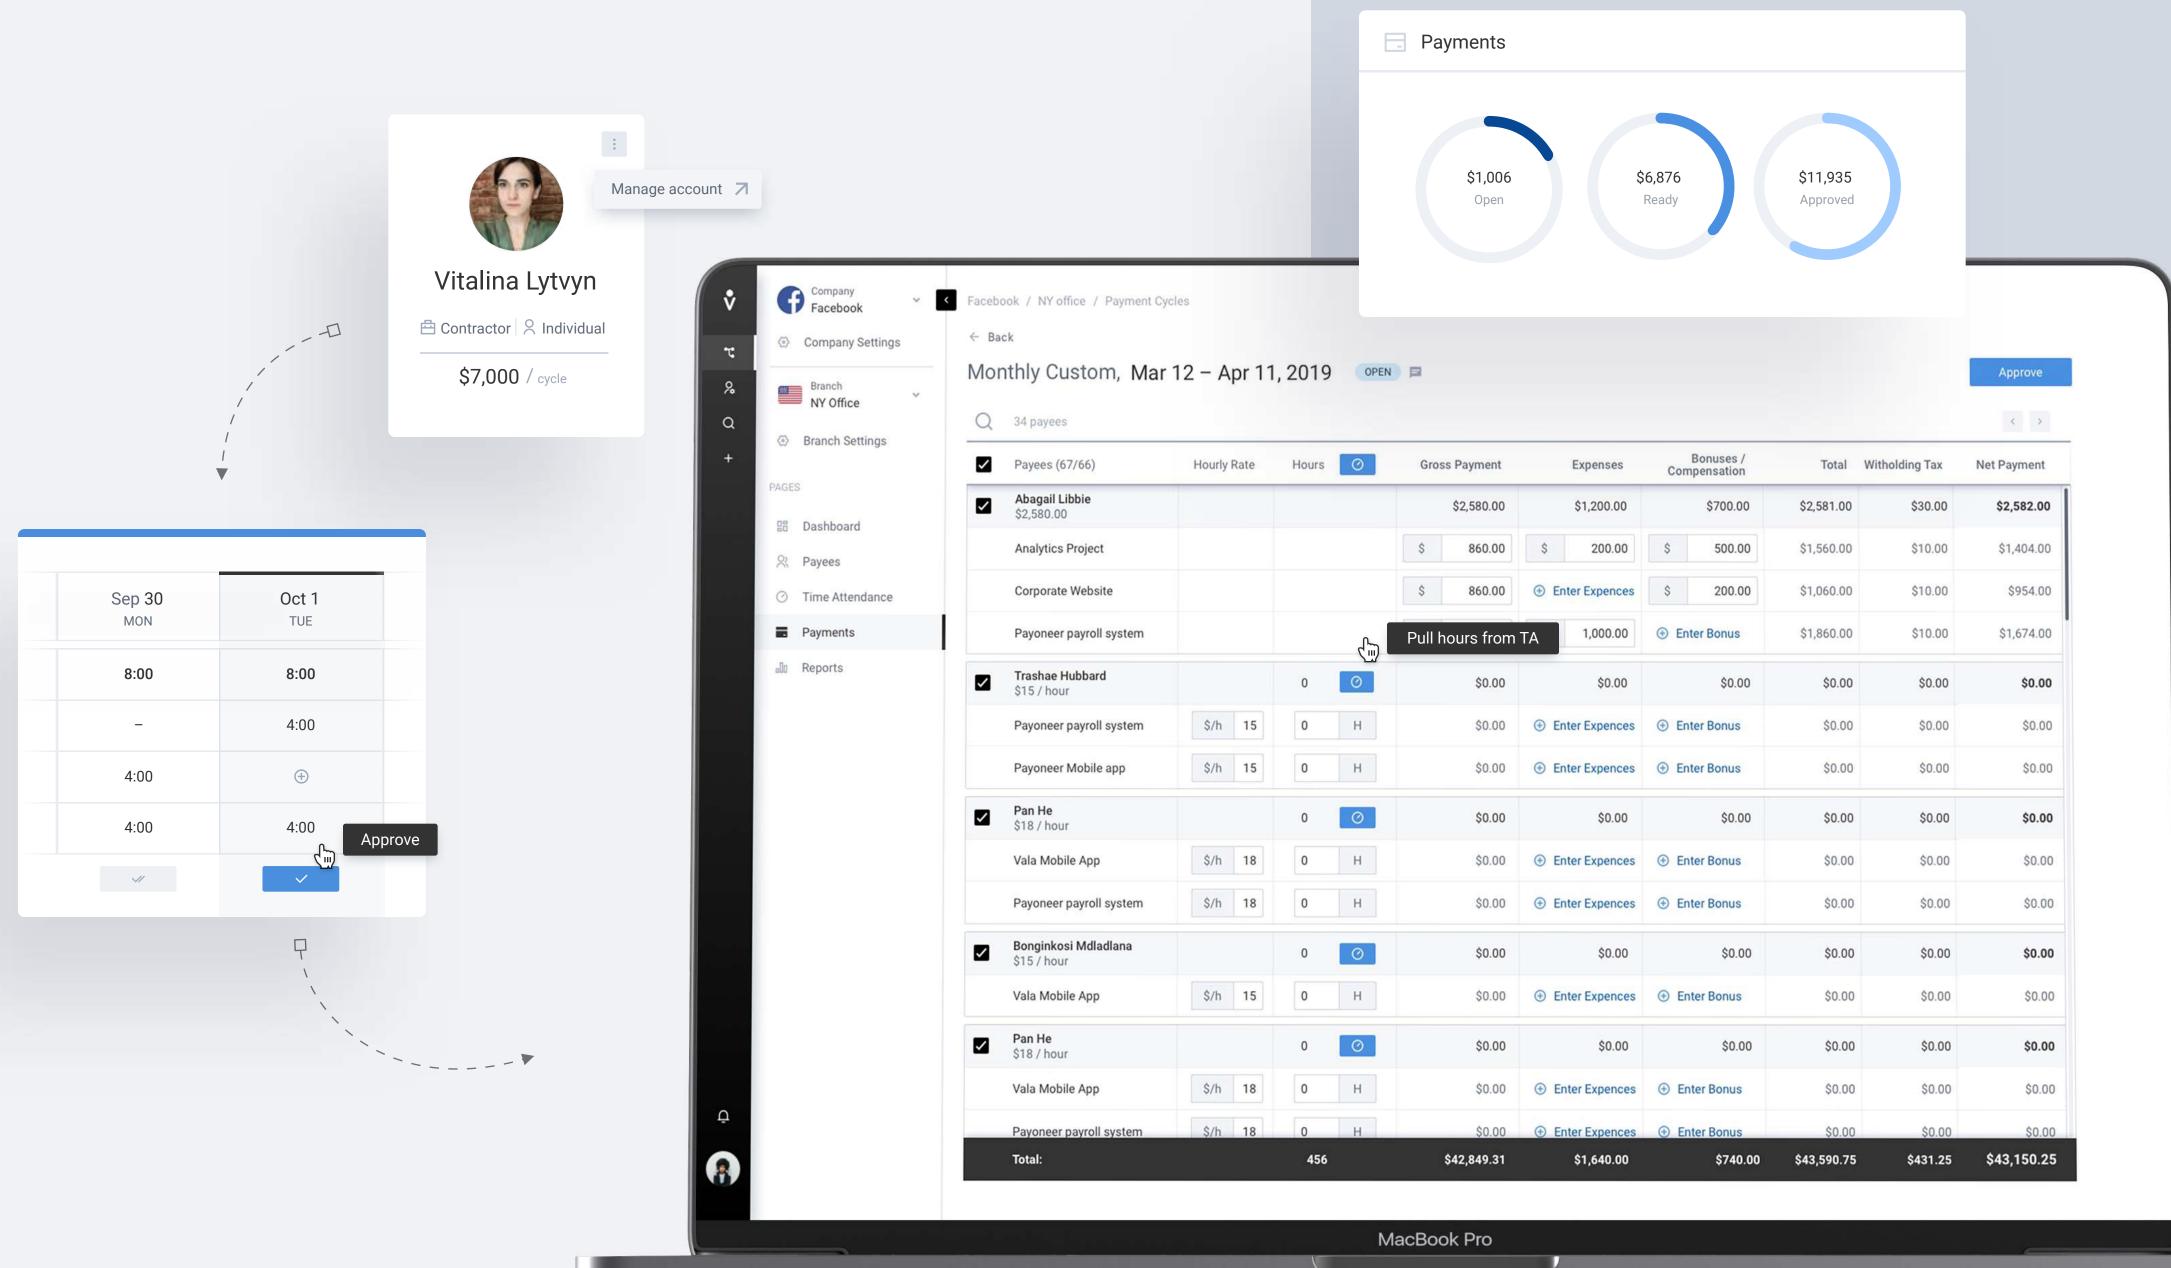

Vue.js

Google Cloud

## Showcases

## **Payrol** Cloud-based payroll solution for small and mid-sized companies to manage payroll around the world

yojji.io

## The Client

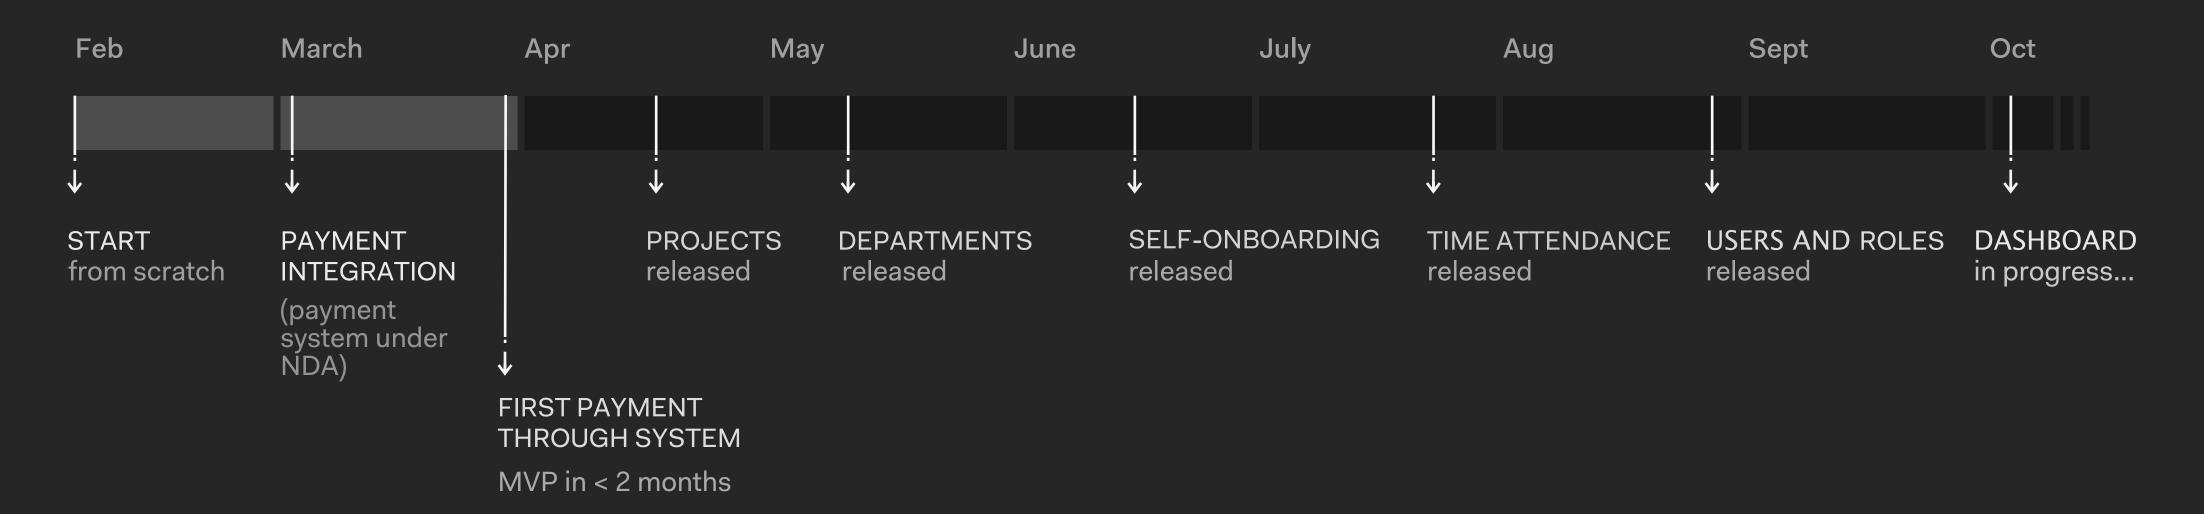

Our client (the name under NDA) – \$1.2b fintech player, approached us (Vala) in January 2019 to build a payroll solution on top of their global financial and legal infrastructure.

## Vala Pay

JavaScript

Angular React & React Native

Redux

Redux-Saga

#### Multiplatform payout system for worldwide money transfers

RxJS

TypeScript

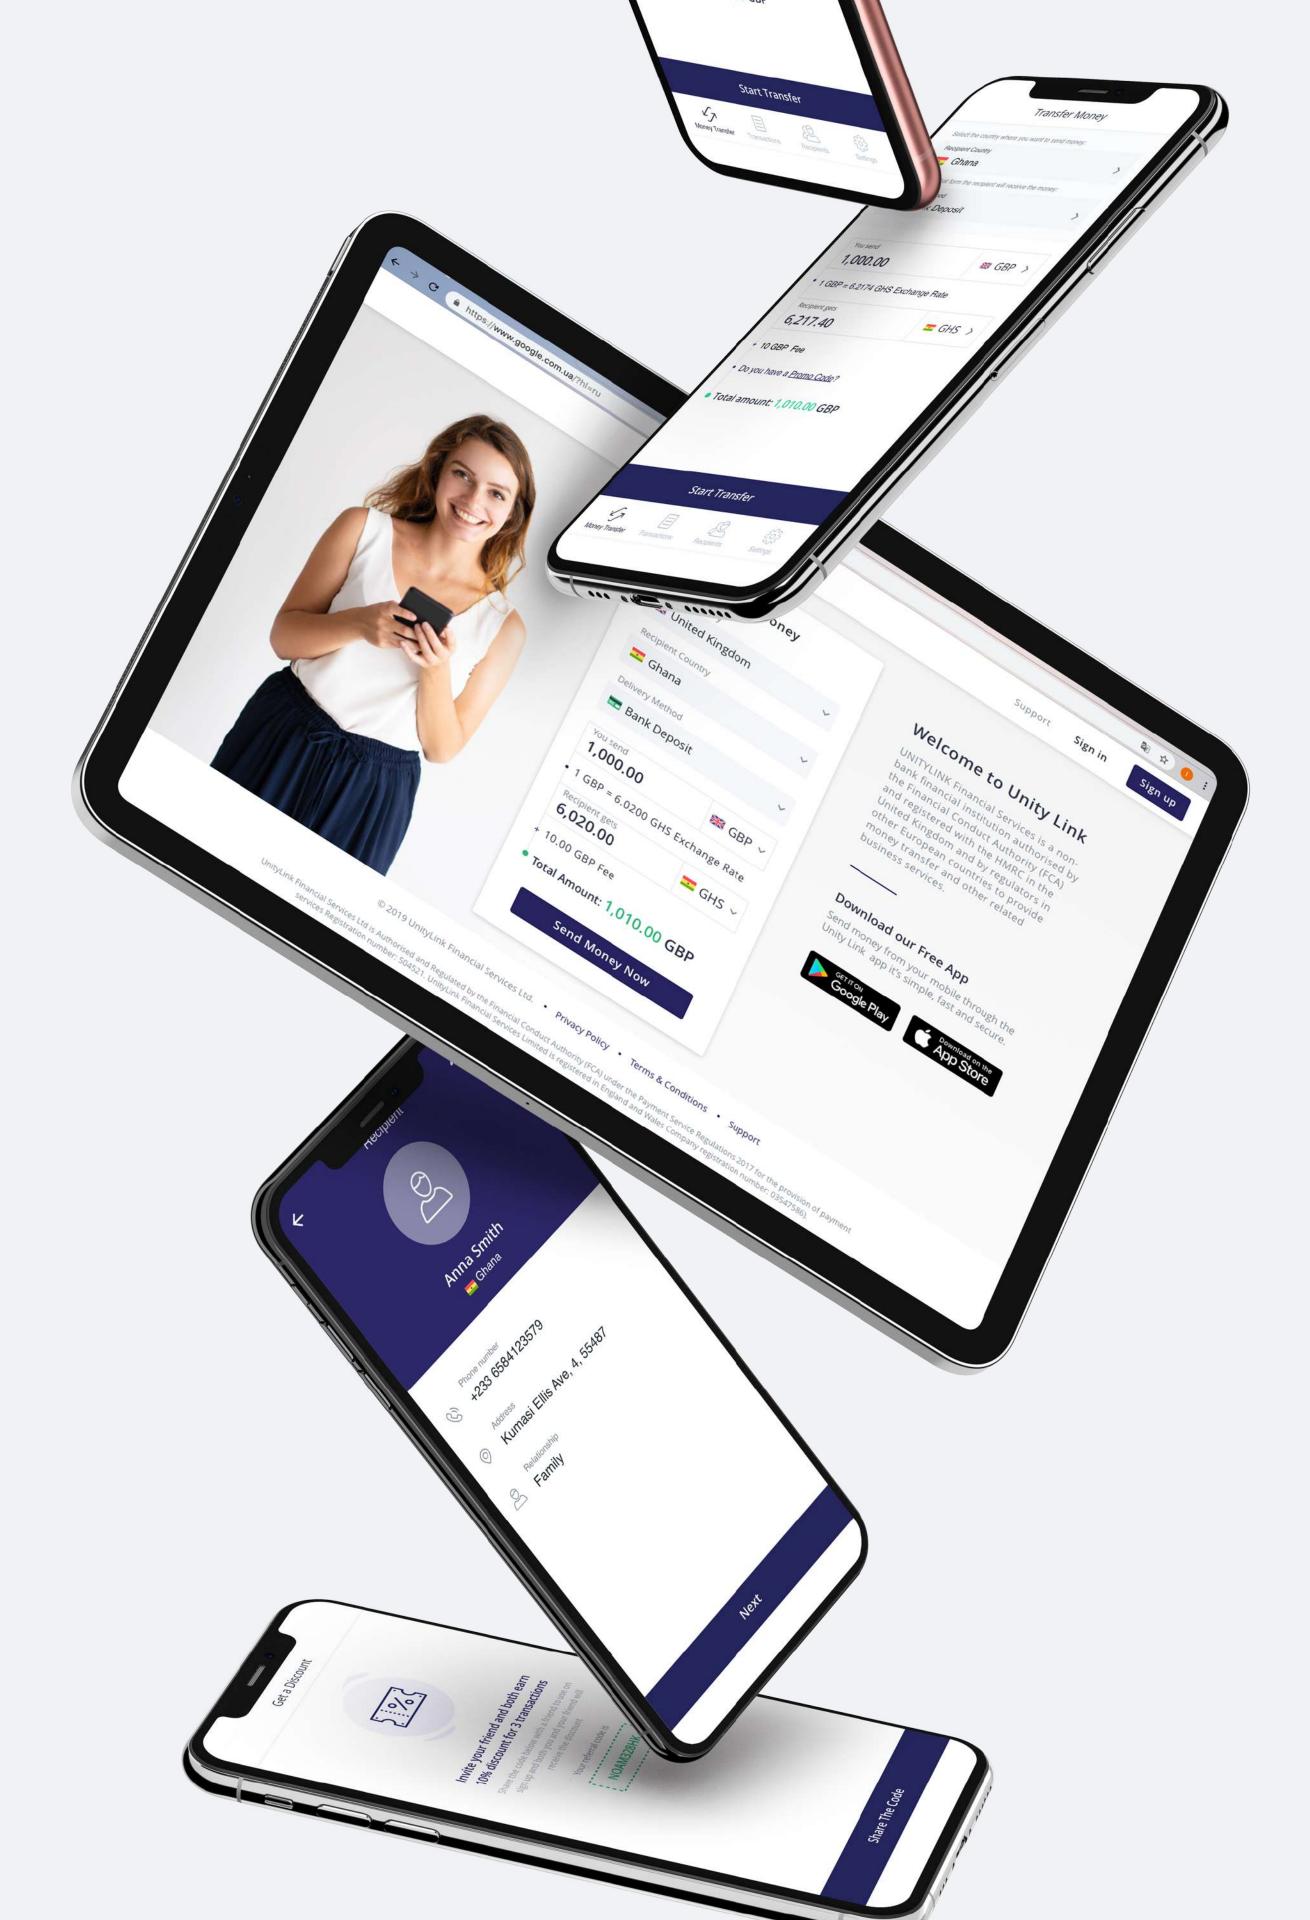

MobX

yojji.io

#### When we started working with Vala Pay it was a young startup-like project with the basic set of functionality.

Gradually increasing functionality and adding new organizations, we faced UX problems, as it was necessary to process and display a large amount of data on one screen.

Therefore, the system was constantly changing and improving both in terms of UX and in terms of code cleanliness, taking into account functional changes and new design approaches.

## Two main goals

#### First goal

#### Second goal

Focus on the support of a large number of organizations both in terms of differences in features (functionality) and in the visual plan, adhering to custom branding.

Implement and release quickly and with basic design principles (convenient for business) and improve their usability in the following iterations (convenient for the user).

## Multiple support
