Abhishek Goyan

SENIOR FULL STACK SOFTWARE ENGINEER

Profile

I am a Senior Full Stack Software Engineer with 9 years of experience. In frontend development, I have expertise in HTML, CSS, JavaScript, React JS, and Next.js. On the backend, I am skilled in Node.js, MongoDB, and Java. I hold a B.Tech degree in Computer Science from Thapar University. Currently, I am working in Oracle's OCI Data Integration and DBCPS-IOD teams, where I contribute to the development of service UI. I am dedicated to delivering high-quality work and stay updated with the latest industry trends.

Employment History

Senior Member of Technical Staff, Oracle, OCI, Bengaluru

JANUARY 2020

1. I worked on the development of the UI for the Data Integration Service, focusing on key features such as Pipeline, Scheduler, and Tasks, among others.
2. Additionally, I contributed to UI Automation using the Cypress Framework, ensuring efficient and reliable testing processes.
3. I have successfully obtained OCI certifications for foundation and Architect Associate, showcasing my expertise in Oracle Cloud Infrastructure.
4. Furthermore, I actively participated in various activities such as Brown bag sessions, writing blogs, and engaging in Micro Learning initiatives to continuously expand my knowledge and skills.

Member of Technical Staff, Aurigo Software, Bengaluru

JUNE 2014 — DECEMBER 2019

1. I developed a hybrid mobile app for Product Masterworks using Cordova, combining the power of web technologies with native capabilities.
2. In the app, I implemented offline maps and enabled annotation of documents, enhancing the user experience and functionality.
3. Additionally, I was involved in the development of Product APIs using Asp.Net, ensuring seamless communication between different components of the application.

Education

B.Tech in Computer Science, Thapar University, Patiala, Punjab

MAY 2010 — JUNE 2014

PROJECTS

1. Developed UI components using ReactJS for the Data Integration Service, including Scheduler, ETL Pipeline, and Task Creation. Actively contributed to design brainstorming sessions and prototype development.
2. Utilized Cordova and JavaScript to create a hybrid mobile app for Masterworks, while also implementing additional APIs for enhanced mobile support.
3. Developed the backend of a book reader community platform using Node.js and MongoDB.
