

# PARA CONE GL GU10

**white / transparent 1-phase spot**

The conically shaped reflector of the PARA CONE GL GU-10 provides a particularly warm lighting effect. The family can be individually combined into a cloud of light with a wide range of colours and sizes. The 1-phase system light is installed conventionally on the busbar system, which makes it flexibly positionable as well as rotatable and pivoting. And last but not least, the housing made of aluminium and glass impresses with its robust quality. When will you test out the benefits of SLV's impressive indoor lights?
