

PARA CONE GL GU10

black / transparent 3-phase spot

With its conically shaped reflector, the PARA CONE GL GU10 provides a particularly warm lighting effect. The black and transparent version can be individually combined with a wide range of colours and sizes of other PARA CONE lamps to create a cloud of light. The 3-phase system light is installed conventionally on the busbar system, which makes it flexibly positionable as well as rotatable and pivoting. The housing is made of robust aluminium and glass and impresses with its impeccable quality. When will you test out the benefits of SLV's impressive indoor lights?
