

PARA CONE GL GU10

white / transparent 3-phase spot

With its conically shaped reflector, the PARA CONE GL GU10 provides a particularly warm lighting effect. The family can be individually combined into a cloud of light with a wide range of colours and sizes. The 3-phase system light is installed conventionally on the busbar system, which makes it flexibly positionable as well as rotatable and pivoting. And last but not least, the housing made of aluminium and glass impresses with its robust quality. When will you test out the benefits of SLV's impressive indoor lights?
