

# GRAFIT E27 square Sensor

**anthracite wall-mounted light**

The GRAFIT wall-mounted light made of aluminium profile convinces with its special effect. The lampshades consist of a satinised acrylic in a grey smoked glass look, which however disappears when switched on. The IP44 protection class makes it ideal for outdoor use. The GRAFIT family includes other wall lights and poles in different heights. In addition to the round shapes, edged models are also available. This version has a motion sensor. All versions can be equipped with E27 lamps in individual light colours. The poles can be used universally due to the open cable end. An optional ground spike is available for easy assembly.
