

RETRO

CON 5P105 Connector 5-pin plug

The RETRO LED trunking system is specifically designed for the tool-less and time-saving upgrade of existing T8 and T5 fluorescent lamps. Thanks to the intelligent click design, the light module can be changed in less than a minute - without any conversion or additional materials. The RETRO connectors are optimised for the RETRO LED retrofit system and provide a secure, tool-less connection between the light modules and the existing trunking. Available in 3- and 5-pole versions, the connectors are compatible with ON/OFF and DALI light carriers. In addition, the RETRO connectors offer maximum compatibility with all standard mounting rails from major manufacturers, ensuring consistent system integration. RETRO is the future-proof solution for demanding refurbishment projects - high output, efficient and easy to install. We will be happy to advise you!

TECHNICAL DATA

Item no.	1009206
Length	30 cm
Net weight	0.05 kg
Gross weight	0.05 kg
