

BATTEN P SCK2000

2000mm

The BATTEN P light family from the SLVtec range offers powerful and flexible LED lighting solutions that are ideal for the energy-efficient refurbishment of existing T8/T5 fluorescent lamp installations. With a light output of up to 150lm/W and a lifespan of 100,000 hours (L80B10), they provide a durable, economical solution for commercial applications such as offices, schools, retail and infrastructure. The lights are available in three lengths (600, 1200, 1500 mm) and have an integrated multi-lumen and multi-CCT function: four output levels and three light colours (3,000/4,000/5,000 K) can be set on site using a DIP switch. Versions with integrated DALI control, sensors or emergency module (3h) are also available for maximum flexibility in lighting design. With its robust aluminium and polycarbonate (IP20, IK04) housing and simple assembly, the BATTEN P is ideal for demanding projects. An optional accessory 2m steel cable suspension kit completes the system and allows flexible mounting options such as ceiling or pendant mounting.

TECHNICAL DATA

Item no.	1009262
Color	stainless steel
Length	5.65 cm
Width	3.62 cm
Height	200 cm
Net weight	0.05 kg
Gross weight	0.06 kg
