

COMPANY PROFILE *About us*

Nondestructive testing popularly known as 'NDT' is widely used in all industries for quality control of their products or maintenance inspection of Plants & Machinery. It has gained acceptance of all International Inspection Authorities due to reliability and reproducibility of test findings. It has unlimited applications and scope of 100% testing without impairing usefulness of a product. With the advancement of technology there is demand for defect free engineering material to ensure satisfactory performance in end use and this assurance cannot be met from sample testing. Again, every industry wants to eliminate defective material at different stages of processing to save time and money before rejection of end product. In fact NDT has its potential role in the cradle to grave cycle of a product. SAYACHAN ELECTRO SYSTEMS started its operation with manufacturing of Eddy Current Sorter & accessories for industrial applications from 2009. Within a very short period it has earned the unflinching patronage of discerning users which include Automobile Industry, Forging Industry and a number of quality conscious Medium & Small Scale Industries in all over India.

Our Products :

- 1) EDDY CURRENT SORTER (Manual, Semi Automatic, Fully Automatic)
- 2) COILS, DEMAGNETIZER,
- 3) BRAIDED COPPER CONTACT PAD,
- 4) X-RAY FILM VIEWER
- 5) RADIATION ALARM

Our Clientele : Steel Plants, Forging Unit, Automobile Industry, Metallurgy Laboratories, Medium & Small Scale Industries at Chennai, Hosur, Coimbatore, Bangalore, Mysore, Mumbai, Pune, Aurangabad., Rohtak, Manesar, Faridabad, Ludhiana, Jaipur etc.
