

Projects and Break Bulks

In the real term, handling of Odd Dimension or uneven size is not only moving the goods in special equipments or break bulk vessels, but it involves planning and proper engineering from Floor to Floor. Loading at manufacturing site and haulage to the loading place is the most challenging job to perform than transporting by chartered Air or by sea to the destination.

We have the experience and outsourced talents to plan and execute the movement of Project cargo handling and break bulk Services.

- Flat Rack & Open Top Containers
- Part & Full Charters by Sea
- Project Engineering
- Air Charter Broking
- Stowage Planning
- Stevedoring
