

BIOSAFE 80

AN EFFECTIVE BROAD SPECTRUM DISINFECTANT

Despite all the precautions taken, chances for the occurrence of the pathogens are non-predictable in aquaculture systems. Hence, disinfectants are being used to eradicate these pathogens from the ponds.

BIOSAFE 80 is a high stable, non-toxic, broad spectrum disinfectant which eradicates the harmful pathogens efficiently and improves the water and soil quality.

Composition:

Alkyl dimethyl benzyl ammonium chloride (ADBAC)	80%
Activants	Q.S.

Dosage:

Shrimp/Prawn 45-75 days	800ml-1000ml/acre/ Water depth of one meter
75th day till harvest	1000ml-1500ml /acre /Water depth of one meter
Fish	1000-2000 ml/acre / Water depth of one and half meter

or as advised by Aquaculture Consultant.

Benefits:

- Eradicates viral, bacterial, protozoal and fungal pathogens
- Prevents gill infection in shrimps and fishes
- Purifies water and prevents pollution
- Active on Pus and necrotic tissue
- It does not interfere with normal healing processes
- Promotes healthy moulting in shrimp and improves growth rate
- Quick in action and effective even in low quantities
- Highly stable and effective in wide range of pH and salinity
