

Renewed Line Frequency Fixed X-Ray Systems.

Certified Renewed

BIOMED XPERT's Precision Assurance.

Line Frequency X-Ray Machines Are Specialized Models For All General Radiography Applications. The Systems Come With Various Combinations Of Examination Tables.

Special Features:

Hand Switch With Flexible Long Cord

Electronic Over-Load Protection

Digital Display of KVP and mAs

Solid State Electronic Timer

Compatible With Various Tables As Per User Intended Application

Major Technical Specifications:

Model: 325 / 525

X - Ray Generator: 2 Pulse, Full Wave Rectified

Output Power : 30 KW / 40 KW

Max. mA Output : 300mA / 500 mA

Application : Radiography

Type Of X-Ray Tube: Rotating Anode, Dual Focus

Small Focus (325): 50 mA, 100 mA

Large Focus (325): 200 mA, 300 mA

Small Focus (525): 100 mA, 200 mA

Large Focus (325): 300 mA, 400 mA, 500 mA

Radiographic KVP (325 / 525): 35 - 125 KVP

Power Requirement : 400 VAC, 3 Phase With Independent Earthing
