Irritation, Temper - Avoid them

In some cases, threat is not from the outside world, it is within us. Your writing shows temper, irritation, tendency to overreact at times. Avoid them before they threaten your mental and physical well being. Destress your mind. Stay calm. Avoid unnecessary arguments. These look tiny issues but in a long run can cause trouble.

GRAPHOTHERAPY

Graphotherapy is a type of therapy that involves using handwriting exercises and techniques to improve a person's emotional, psychological, and behavioural well-being. The theory behind graphotherapy is that the way a person writes can reveal unconscious thoughts, feelings, and behaviour patterns and that changing the way a person writes can help them change those patterns and improve their mental health.
