

ABOUT US

M Electronics is a trading company established in Beirut - Lebanon in 2012.

We started out with a focus on wholesale of high-quality LED lights fixtures for home, office, & warehouse use. We were one of the few traders who introduced LED lights to the market. Currently, the market's demand increased as awareness of the advantages of LED lights economically and environmently were spread.

As we integrated the market as a new trader and got goodwill for our brand, we expanded our supply to include electrical products and its accessories. Moreover, we also provide electrical services.

OUR BRANDS

CERTIFICATIONS

Dedicated to quality, our team strives to ensure that all imported products meet objectives of the mission set and comply with the relevant safety requirements and guidelines of CE- EMC, CE- LVD, FCC, and RoHS standards.

We test all products before deployment from the manufacturing warehouse to ensure the standard requirement are met.

RoHS **CE**

Sample certification of one of our brands.
