• Aside from the many distracting grammatical errors, I feel like the course materials were lacking. Though the information included was necessary, there were things (such as how to take an effective and professional image) that could have been included that would have been more helpful.

### 2 - The D2L course was user-friendly and easy for me to navigate.

11 - What are the strengths of the course?	
Rebekah Venturini	
<b>Response Rate</b>	5/10 (50%)
<ul style="list-style-type: none"> <li>• This course has really helped me to understand just how much thought needs to go into an effective marketing design. I feel that I have been prepared for what challenges will lie ahead while I work through this degree program.</li> <li>• This course helps you step outside of your bubble and be creative. This course helped a lot of people see their full potential with the things they can do . Im happy Rebekah was. the instructor. She helped me tremendously succeed not only in this class but in other classes as well.</li> <li>• This course had a great instructor, who for her first time teaching here, did a wonderful job.</li> <li>• Learning different ways of design and concepts of design</li> <li>• Rebekah always caring so much about us understanding the assignment and the concept. That we have freedom to find solutions with our own creativity.</li> </ul>	

12 - What areas of this course could be improved?	
Rebekah Venturini	
<b>Response Rate</b>	5/10 (50%)
<ul style="list-style-type: none"> <li>• I feel like this course may be unintentionally reliant on adobe programs. I feel like all adobe programs should be available to VSC majors, particularly if they are expected to be used in a course. I frequently worried that my lack of access/experience would hold me back from succeeding in my assignments.</li> <li>• the areas that can approve in this class are just being more clear on the assignment detail. The directions sometimes was a little confusing to understand.</li> <li>• Being able to teach other things that could be needed to complete assignments.</li> <li>• Definitely my deliverance</li> <li>• The instructor should be allowed to show us how to use different software since we are not able to have any hand written/drawn stuff for a portion of the course and done students didn't have software in their computers. Luckily I already had raster graphics and was in vector graphics so I didn't have that issue.</li> </ul>
