2014+ Harley-Davidson® Saddlebag Audio Kit

TMS69BL14

Retrofit kit allows addition of rear speakers on your existing factory bag lids and plug directly into a Rockford Fosgate front audio kit that utilizes the Power T400X4ad, TM400X4ad, or M5-800X4 4-channel amplifiers. Eliminates need to paint and color match. You will need to flash your factory radio to use this kit. Not designed for factory amplifiers.

1998-2013 Harley-Davidson® Saddlebag Audio Kit

TMS69BL9813

Retrofit kit allows addition of rear speakers on your existing factory bag lids and plug directly into a Rockford Fosgate front audio kit that utilizes the Power T400X4ad, TM400X4ad, and M5-800X4 4-channel amplifier. Eliminates need to paint and color match. Not designed for factory amplifiers.

2014+ Harley-Davidson® Dual 10" Saddlebag Subwoofer Kit

HD14-SBSUB

Next level performance with Rockford Fosgate's 800 Watt Dual 10" subwoofer system, purpose-built for 2014+ Harley-Davidson touring models.

- Plug-and-Play Design
- Full Throttle Bass Output
- Flexible Bass System
- Rockford Motorcycle Ecosystem

2014+ Harley-Davidson Road Glide & Street Glide Stage-2 Kit Gen-3

HD14-STG2

The next step in motorcycle performance, our M5 audio kits are the loudest and clearest audio systems we've created. Featuring simple plug-and-play installation and paired with freeway speed output all create the best in class on bike audio experience.

- Plug-and-Play Design
- Full Throttle Output
- Element Ready™
- RF3 (Rockford Factory Fit and Finish)

2014+ Harley-Davidson CVO Stage-2 Kit, Gen-3

HD14CVO-STG2

The next step in motorcycle performance, our M5 audio kits are the loudest and clearest audio systems we've created. Featuring simple plug-and-play installation and paired with freeway speed output all create the best in class on bike audio experience.

- Plug-and-Play Design
- Full Throttle Output
- Element Ready™
- RF3 (Rockford Factory Fit and Finish)

2014+ Road King® 2-Speaker & Amp Kit

HD14RK-STAGE2

The HD14RK-STAGE2 is a high-performance audio kit for select 2014 and newer Road King motorcycles designed to deliver an exceptional sound experience while retaining as much interior bag space as possible. Kit includes a 6"x9" saddle bag speaker retrofit kit, 400-watt amplifier, Bluetooth® receiver, and a plug-n-play wiring harness. Prewired expansion input for use with lowers (see specifications table for required connector.) NOTE: The handlebar remote control is an optional accessory.

1998-2013 Harley-Davidson® Road Glide® Source Unit, 2-Speaker Kit, Gen-3

HD9813RG-STAGE1

Add a high-performance 2-speaker, 50-watt audio system to your motorcycle, purpose built for select 1998-2013 Harley-Davidson® Road Glide® models. System includes a replacement digital media receiver and two 6.5" fairing speakers.

1998-2013 Harley-Davidson Road Glide Stage-2 Kit, Gen-3

HD9813RG-STG2

The next step in motorcycle performance, our M5 audio kits are the loudest and clearest audio systems we've created. Featuring simple plug-and-play installation and paired with freeway speed output all create the best in class on bike audio experience.

1998-2013 Harley-Davidson® Electra Glide® Ultra Classic® Source Unit & 4-Speaker Kit, Gen-2

HD9813SGU-STAGE1

Add a high-performance 4-speaker, 50-watt audio system to your motorcycle, purpose built for select 1998-2013 Harley-Davidson® Electra Glide® Ultra Classic® models. System includes a replacement digital media receiver, two 6.5" fairing speakers, and two 5.25" TourPak speakers.

Power Harley-Davidson® 5.25" Full Range Tour-Pak Speakers (1998-2013)

TMS5

The TMS5 is a full range coaxial speaker designed to fit the Tour-Pak speaker locations of the 1998 - 2013 model year Harley-Davidson® Motorcycles. It features a Neodymium motor structure driving a co-molded, reinforced polypropylene cone with Santoprene surround. It also features an ultra-efficient 25mm dome tweeter with integrated phase plug and is made water/weather resistant with the addition of a Santoprene front isolation spider connecting between the tweeter housing and cone assembly. The speaker mounts using the factory hardware and comes with new grille assemblies.

Harley-Davidson® 6.5" Full Range Upper/Lower Fairing and Tour-Pak Speakers (2014+)

TMS65

The TMS65 is a full range coaxial speaker designed to fit the upper fairing, lower fairing (non-cooled), and TourPak locations on 2014+ Harley-Davidson® BOOM!™ Audio and BOOM!™ Audio Stage-I systems. It features a Neodymium motor structure driving a co-molded, reinforced polypropylene cone with Santoprene surround. It also features an ultra-efficient 25mm dome tweeter with integrated phase plug and is made water/weather resistant with the addition of a Santoprene front isolation spider connecting between the tweeter housing and cone assembly. The speaker mounts using the factory hardware and comes with three grille assemblies for Sharknose, Batwing and TourPak installations.

Power Motorcycle 6"x9" Full Range Bag Lid Speakers

TMS69

The TMS69 full range coaxial speaker is designed for use in bag lid applications for motorcycles. Designed lightweight so it doesn't weigh down your bag-lid, it features a very powerful Neodymium motor structure for a fraction of the size and weight of traditional ceramic ferrite magnets. The driver uses a co-molded, reinforced polypropylene cone with Santoprene surround. It also features an ultra-efficient 25mm dome tweeter with integrated phase plug and is made water/weather resistant with the addition of a Santoprene front isolation spider connecting between the tweeter housing and cone assembly.

Power Harley-Davidson® Road Glide® 6.5" Full Range Fairing Speakers (1998-2013)

TMS6RG

The TMS6RG is a full range coaxial speaker designed to fit the fairing speaker locations on select model Harley-Davidson® Road Glide® Motorcycles. It features a Neodymium motor structure driving a co-molded, reinforced polypropylene cone with Santoprene surround. It also features an ultra-efficient 25mm dome tweeter with integrated phase plug and is made water/weather resistant with the addition of a Santoprene front isolation spider connecting between the tweeter housing and cone assembly. The speaker mounts using the factory hardware and comes with new grille assemblies.

Power Harley-Davidson® Electra/Street Glide® 6.5" Full Range Fairing Speakers (1998-2013)

TMS65G

The TMS65G is a full range coaxial speaker designed to fit the fairing speaker locations of select model Harley-Davidson® Electra Glide® and Street Glide® Motorcycles. It features a Neodymium motor structure driving a co-molded, reinforced polypropylene cone with Santoprene surround. It also features an ultra-efficient 25mm dome tweeter with integrated phase plug and is made water/weather resistant with the addition of a Santoprene front isolation spider connecting between the tweeter housing and cone assembly. The speaker mounts using the factory hardware and comes with new grille assemblies.

Power 5"x7" Harley-Davidson® Replacement Bag Lid Speakers

TMS57

The TMS57 full range coaxial speaker is designed to replace existing 5"x7" 2-way coaxial speakers in factory equipped Harley-Davidson® "Boom!™ Audio" and "Boom!™ Audio Stage-I" bag lids. The TMS57 features a Neodymium motor structure driving a reinforced polypropylene cone with Santoprene surround. Highs are produced by an ultra-efficient 25mm dome tweeter with integrated phase plug and is made water/weather resistant with the addition of a Santoprene front isolation spider connecting between the tweeter housing and cone assembly. The speaker features two types of connectors, a standard set of terminals for 2013 and older generation motorcycles, and a new Deutsch style connector for 2014 and newer.

NOTE: Not compatible with "Boom!™ Audio Stage-II" systems.

Punch 400 Watt Full-Range 4-Channel Amplifier

PBR400X4D

The Punch PBR400X4D is a 400 Watt full-range amp designed for compact systems. This efficient 4-channel amp packs a Punch in UTVs, motorcycles, and hybrid-electric vehicles without sucking a lot of juice from your electrical system.

Punch 300 Watt Mono Amplifier

PBR300X1

The Punch PBR300X1 is a 300 Watt mono amplifier designed for compact subwoofer systems. This efficient amp packs a Punch in motorcycles, ATVs and hybrid-electric vehicles without sucking a lot of juice from your electrical system.

Punch 300 Watt 2-Channel Amplifier

PBR300X2

The PBR300X2 is a 300 Watt amplifier with Boosted Rail Technology, allowing it to be compact and efficient while providing big power. This amp is great for smaller stealth installations, motorcycles and recreational vehicles.

Bluetooth Universal Remote

PMX-BTUR

The PMX-BTUR is a universal Bluetooth® remote control designed for use with any audio system that utilizes a mobile device (phone) as a source having Bluetooth® connectivity. Adjust Volume, Track, Play, and Pause on Android® or Apple® mobile devices. The Bluetooth® 4.0 Smart Ready receiver quickly and easily pairs with your mobile device using an easy one-button pairing control. Also compatible directly with the PMX-1 source unit. Can be used for hand-held or steering wheel applications using included bezel and Velcro strap.

Designed for Mobile, Marine, Motorsport and Motorcycle applications.

Digital Media Receiver for 1998-2013 Harley-Davidson

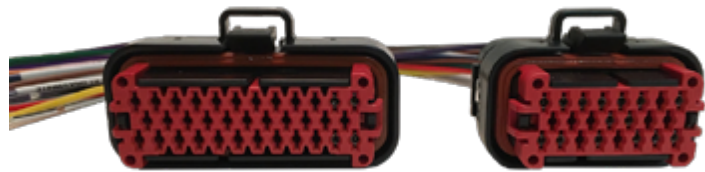

PMX-HD9813

Direct replacement digital media receiver for select 1998 - 2013 Harley-Davidson® motorcycles. Features 3-inch full color, ultra-bright display with day/night modes and oversized buttons for easy control. Engineered for the ultimate in performance and sound quality featuring 4-Volt pre-amp outputs that don't clip! Plug and play installation with OEM electrical system requires no additional wiring or cutting of existing factory harnesses or components. Retains factory thumb controls.

Replacement Power and Speaker Harnesses for PMX-HD9813

1130-72997-01

Replacement harnesses to operate the PMX-HD9813 source unit. To be used for dealer displays or for installations where the factory Harley-Davidson® harnesses have been cut off or damaged beyond repair.

Replacement Hardware Kit for HD14-SBSUB

1130-75394-C1

Replacement hardware kit for Harley-Davidson aftermarket saddlebag subwoofer kit. If your saddlebag gets damaged, this kit will allow you to transfer the components to your new replacement saddlebag.

Replacement Subwoofer for Aftermarket Harley-Davidson & Can-Am

1465-73499-C1

This replacement subwoofer is designed for Harley-Davidson and Can-Am subwoofer systems. This model is a "deconstructed" subwoofer equivalent to the M1D2-10B Marine M1 model, but without RGB illumination. It's designed for high performance bass output in small sealed enclosures and features a 2Ω dual voice coil wired in series to create a 4Ω amplifier load. This item is sold as a single unit (not in pairs).

Replacement Grilles for TMS69BL14

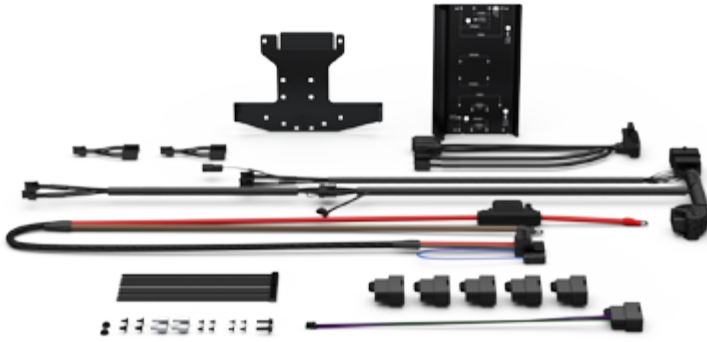

1510-73023-01

Replacement Grilles for TMS69BL14. Includes left and right replacement grilles for select 2014 or newer Harley-Davidson models. These are aftermarket grille replacements, not designed for factory equipped audio systems.

2014+ Harley-Davidson Road Glide, Street Glide, Ultra & CVO Amp Install Kit (Gen-3)

RFK-HD14M5

The next step in motorcycle performance, featuring simple plug-and-play installation creates the best in class on-bike audio experience.

- Plug-and-Play Design
- Element Ready™

1998-2013 Harley-Davidson® Road Glide® & Street Glide® Amplifier Wiring Kit (Gen-2B)

RFK-HD9813

The RFK-HD9813 is an amplifier installation kit for the Power Marine TM400X4ad amplifier on Harley-Davidson® model years 1998 to 2013. Integrates into factory electrical system without modifications or cutting.
