09 GMC SIERRA 1500 - COUVRE CAISSES TONNEAU

PRODUCT CODE: ULT070 272601
Features straight bows providing a smooth, flat look to the bed when closed, and roll up with the cover to disappear out of the way. The industrial strength hook and loop system provides continuous contact between the rails and cover, ensuring that the bed is kept clean and dry. Easy to fasten even in freezing temperatures.

PRODUCT CODE: ULT070 92457
Features convenient-to-use tri-fold design. To ensure superior strength, the cover uses commercial-grade rails and I-Beam Monster Bows that are secured with multiple reinforcements using zinc dichromate, aluminum braces. The tight-fitting tarp comes with anti-curl corners for the cover to look neat, always. Comes with protective padding for the cover not to scratch the delicate paint job of your truck.

PRODUCT CODE: ULT070 1572616
Premium matte black woven fabric. Inherent dirt resistant characteristics of the fabric help it stay clean for longer. Xtra-low profile X15 rails are incorporated into the design providing a distinctive flush mount look. Heavy-duty matte black aluminum slats are pressure bonded to the fabric for additional strength and resiliency.

PRODUCT CODE: ULT070 60482
This retractable tonneau cover can be locked in any position along the rail and its secured with its own keys. Features a spiral track storage canister that prevents the cover from rubbing on itself as it retracts and closes, and won't obstruct access to your cargo when you need it. The cover glides easily thanks to sealed ball bearings, and installs with no drilling.

PRODUCT CODE: ULT070 RTX59116
T-handle front clamps to secure cover to bed. "J-lever" rear clamps for ease of access to your cargo. Aircraft grade painted aluminum frame and strong hinges. Heavy duty vinyl fabric with binding for wear protection. Seals out dust and moisture from your cargo.

PRODUCT CODE: ULT070 39131
Patented locking rails help provide full bed security as the hard cover is nearly impossible to get into. Elements cannot harm your precious goods. Easily operate the cover from either side with the automatic slam latch and secure it when rolled up with the durable buckle straps. All of the supplied hardware is 3X thicker and heavier duty to give added strength.

PRODUCT CODE: ULT070 20-1256
An inventive quick latch system makes operation a breeze, and with a locking tailgate, you know your cargo will be safe. Will improve your fuel economy by up to 15%. Durable and light weight, the powder coated aluminum frame and cross members are topped with a rugged, UV protected vinyl coated tarp.

10 GMC SIERRA 1500 - LEVELING KIT

Even out the stance of your truck or SUV with premium grade leveling kits. The ultimate suspension upgrade for your truck.

- Black powder coat finish over A-coat

CONTRÔLEURS DE FREINS ÉLECTRONIQUE

PRODUCT CODE: ULT070T90885

- For trailers with 2, 4, 6 or 8 brakes.
- Digital display depicts voltage delivery to trailer during braking
- No level adjustment necessary - it adjusts itself to varying terrain as you drive
- Great for backing into tough spots! Works proportionally in reverse with the ability to disable when not needed
- Produces stops that are in proportion to vehicles deceleration rate
- Continual diagnostics check for proper connection, shorted magnet conditions and much more
- “Boost” feature gives users the ability to apply more initial trailer braking power when towing heavier trailers

12 GMC SIERRA 1500 - POWERSTEP (NERF BARS)

One of the best ways to upgrade your truck is to add nerf bars to your vehicle. Like any great truck accessory, truck steps and nerf bars both look great and functionally improve getting in and out of your rig.

17 GMC SIERRA 1500 - O.E.M POWERCHIPS ®

Safely experience dramatic performance gains in every day driving without voiding the warranty.

O.E.M. Performance Remapping Program
REVERSED ENGINEERED TUNING®

The O.E.M. performance remapping program software is designed by a group of engineers that work at a major automobile manufacturer in Stuttgart Germany. They prepare software for the private racing community and select European car manufacturers. The principle process of using the car’s original software and reverse engineering its perimeters safely, allows the automobile to perform significantly better without voiding the warranty. All diagnostic settings and codes are kept intact while dramatic performance gains are experienced in every day driving. This process of enabling vehicles to run more efficiently at lower rpms results in less wear and tear and better fuel economy. This remapping process permits engines to run full strength at low rpms.
