TRUCK-GUARD®

Commercial Lubricant Range

The **TRUCK-GUARD®** range of commercial fleet lubricants ensure increased engine component life, reduced oil and fuel consumption and lower particulate emissions throughout the arduous commercial environment. Support products include advanced gearbox oils, axle and bearing greases through to specialist damping oils for suspension systems.

Like modern automotive applications, commercial lubricants have to meet exacting requirements due to a combination of increased power levels, extended drain intervals, economy requirements coupled with ever more stringent emission analysis. The latest regulations ensure that all modern commercial vehicles comply with agreed emission levels which necessitate the use of filtration systems such as SCR (Selective Catalytic Reduction) and EGR (Exhaust Gas Recirculation) to ensure that emissions are reduced. These systems place further demands and increase requirements on commercial lubricants.

TRUCK-GUARD meets and exceed the demands of the major commercial vehicle OEMs ensuring that that they optimize vehicle performance, economy, service life and reliability.
