

## Cloud Dough Sand

The consistency of this dough is consistent with damp sand. It can be powdery and pourable, yet moldable like damp sand when you squeeze it.

### Ingredients

- 4 cups flour
- ½ cup vegetable oil

### Instructions

1. Measure the flour into a dishpan or tub.
2. Make a well in the middle of the flour.
3. Pour the oil into the well.
4. Together with child, use hands to gently mix it until all oil is incorporated into the flour.
5. Enjoy mixing and learning about the properties of the dough.
6. Add materials to help explore like, small bowls, measuring cups, scoops, spoons, etc. Build sculptures, castles, pretend food .... As you would with wet sand.
