CASE STUDIES

Class Action

- Retained by a prominent plaintiff's law firm to assist in a product liability class action matter.
- Our multi-disciplinary team identified, acquired, and analyzed transactional data from enterprise systems.
- We performed forensic collections from various locations, ESI processing, and data analytics.
- We also provided a 25-attorney managed review and support for multiple plaintiff firms and defense counsel.

Regulatory Investigation

- Retained by a global accounting firm on behalf of a Fortune 100 Energy company.
- Our team applied data modeling and statistical analytics for expert reports.
- We leveraged a proprietary fraud analytics platform and Relativity to review the data sets.
- Managed three TB's of data and completed the project four weeks ahead of schedule.
