HAZCOM  
Search Engine v1.2

The HAZCOM Search Engine v1.2 has been designed then enhanced to facilitate the management of HAZCOM associated documents.

Using the IHI LTD software application makes it easier and faster for all your staff to find Safety Data Sheets. The software is fully customizable according to your needs. The search for a SDS has now become a one-click search.

## HAZCOM Search Engine v1.2

Low-Cost and Open-Source Solution

### « To try it is to adopt it »

The HAZCOM Search Engine is currently used in Oil & Gas and Mining Industry in Middle East and Africa and is well appreciated by the users. Simple, User-friendly, Efficient, Fast, that are the comments we receive from our clients.

## Database Management

The data management is assured with administrator permissions giving access to the Admin corner.

### 1. Add/Delete an Item

You can add or delete any item. Deleting an item will also remove all documents associated with it.

### 2. Attach a SDS and create Backup

After creating an item, you can attach any associated document like SDS, Safety Label, etc. You also have option to create backup and ensure that your data are recorded.

### 3. Create Metadata

Add metadata to facilitate and enhance your searches.

# Open-Source Solution

Stop using File Explorer, Excel or Access, which are all unsuitable and time-consuming tools often used for managing your HAZCOM documents.

Stop paying for expensive applications used for half their capacity.

Adopt the HAZCOM Search Engine now. It has been designed by and for Health & Safety specialists who care about industry challenges.

Manage your library of Safety Data Sheets. Employees can easily search and print SDSs for all of the chemicals they work with.

1

**Low-Cost Solution:** This is the cheapest and simplest solution on the market to get control of your Safety Data Sheets, Safety Labels, and other documents associated to the hazardous material used in your facilities.

2

**User-Friendly:** Your personnel will have access to the search engine through your server, intranet, etc. All information available with a single click from the home screen.

3

**Fast and Efficient:** Medical services, Emergency Response team, First aiders, and all personnel can have access to the information quickly in manner to react promptly to any emergency situation.
