

INDUSTRIAL HYGIENE

Whether it is for anticipating, recognizing, evaluating or controlling the environmental factors present in your workplace, our team has the experience to guide and assist you through the provision of innovative and sustainable solutions.

With its experience in industrial hygiene and occupational health, IHI offers a very diversified range of services to its customers.

Our board-certified industrial hygienists have the necessary training, professional background, and expertise to develop and carry out assessments for every aspect of industrial hygiene. All laboratories we collaborate with are fully certified and accredited.
