MAKE IT AVAILABLE AND MAKE IT AFFORDABLE

AKRON PHARMA

Akron Pharma, Inc. founded in 2015 is a privately held pharmaceutical company, focused on developing and marketing generic products. We are an Own Label Distributor which performs pharmaceutical research, development, and distributes within the United States. We focus on a broad range of generic products, in various dosage forms covering a broad range of therapeutic categories.

Akron takes pride in a special focus on generic pharmaceuticals, producing a safe and effective alternative to brand name drugs. Generic medications are the same as the brand name drug in dosage form, safety, strength, route of administration, quality, performance characteristics, and intended use. Generic manufacturing and packaging sites must pass the same quality standards as the brand name drug manufactures. Our fully integrated manufacturing network capabilities from API to inished formulation, creates a value chain that drives proitability and extends affordability to consumers. Akron believes affordable generic medication improves patient access and adherence to pharmaceutical therapies.

Akron has helped make a difference by developing, manufacturing, and commercializing generic medications as cost effective solutions for patients, suppliers, and stakeholders across the healthcare continuum. Our products advance enhanced access, safety, quality, and transparency which makes the Akron label is recognized name nationally by retail pharmacy chains, mail order pharmacies, pharmacy beneit managers, managed care facilities, and group purchasing organizations, including the wholesalers and distributors throughout the United States.

Akron Pharma additionally markets for Aum Pharmaceuticals, a division of Akron Pharma which focuses on our specialty product line creating a unique portfolio for Akron Pharma.

Akron Pharma, Inc.
373 RT US 46 W Building E,
Suite 117, Fairfield, NJ 07004
