

# THE WORLD'S SAFEST SAFETY CHUCK™

Have you ever had an operator forget to close a chuck?  
Are you trying to eliminate pinch points?

**Double E's Auto-Lock™  
Safety Chuck  
Automatically Closes  
when Rotation Begins.**

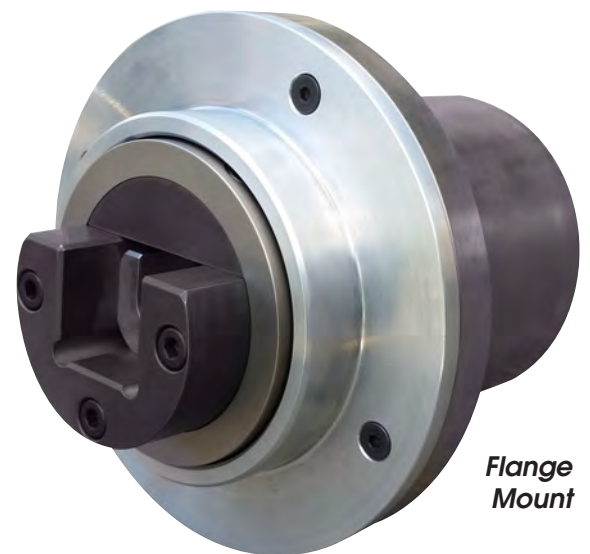

Patent-pending design uses preloaded spring tension to lock the chuck in the closed position.

**You can upgrade any brand of safety chuck.**

If you are focused on operational safety, Double E's Auto-Lock™ Safety Chuck with exclusive Fail-Safe Closing™ is the answer.

Double E's sliding design eliminates pinch points.

Redundant safety features ensure 100% roll security at closing.

# *Double E's Auto-Lock™ Safety Chuck Delivers Unparalleled Performance and Easy Installation*

## **Ideal Upgrade for Any Traditional Safety Chuck**

### **Auto-Lock™ Safety Chuck Features:**

All models include Fail-Safe Closing™ functionality.

Exact drop-in replacement for any safety chuck, including obsolete SuperChuck models.

Double E's maintenance-free sliding action is safer, more reliable, and more durable than tilting faceplates.

Easy conversion – upgrade requires no bulky adapter plates.

Available in both foot and flange mount models.

No need to modify shaft length or shaft center line height.

Double E's exclusive replaceable inserts with U (square) or V (square-turned-45°) jaws.

Double E provides a full range of web processing accessories including **core chucks, core shafts, safety chucks, core cutters, idler rollers, brakes, web guides, tension control systems, knife holders, shafted roll stands, and slitting modules.**
