

### **Placenta Stamping:**

For those that choose to or cannot capsule their placenta; I can ink or use its own blood to stamp the placenta on a white card stock.

For those encapsulating; I stamp the placenta in the blood, (you don't want to ingest ink).

The Tree of Life Stamp can be placed in a sleeve for a baby book or framed for a nursery wall. It reveals the "Tree of Life" that it actually has been for the last 9 months. It provided oxygen, nutrients to your growing baby and removes waste products from your baby's blood. I place the baby's information; Full Name, Day, Time and Date of Birth, Weight & Height on a tag, next to the Stamp on the card stock, then placing it in a sleeve for a baby book or frame it for a wall.
