

Umbilical Cord Art:

Your baby's umbilical cord was what the two of you were connected by. It is a tube-like structure that connects your baby to you via your placenta. The umbilical cord carries nutrients and oxygen from your placenta into your baby's body, and then carries waste material out. I can shape it to whatever you would like, granted if it is long enough?

Some choose a word like love, joy, boy, girl or peace, a name Leo, Don, Joy, Beth others want a wreath or a heart shape. This is a fun keepsake for a baby book. I process the cord along with your placenta and return it in a small 3x4 sealed baggie with a tag that has baby's information; Full Name, Day, Time and Date of Birth, Weight & Height.
