

# SEAMLESS MONITORING & IT MANAGEMENT

## Networking Management and Monitoring

### **WHO WE ARE**

Established in 2002, Verus Cloud Secure is a Philadelphia area based Managed IT, cloud computing and cybersecurity organization. Our reputation as one of the most dependable and reliable IT management providers in the industry is the reason why Verus is continually chosen for our comprehensive technology solutions. We are laser focused on customer service and reliability.

### **NETWORK TOPOLOGY**

#### **AUTOMATED NETWORK MAPPING**

In minutes, see a complete map of physical and logical topologies.

#### **AUTOMATED INVENTORY**

Have a profile for every device on a network at your fingertips. Export the data to a spreadsheet.

#### **NETWORK DOCUMENTATION**

Instantly know how everything on a network is connected and configured.

#### **IP ADDRESS MANAGEMENT**

Get an automatic list of all the IP addresses you're currently using and which devices are using them.

#### **MAP SEARCH & FILTER**

Quickly find and visually isolate any part of a managed network.

#### **MAP EXPORT**

Print any map view to PDF or SVG for easy sharing or storage.

### **USER AND CREDENTIAL MANAGEMENT**

#### **PASSWORD MANAGEMENT**

Never again forget device credentials or leave them vulnerable.

#### **MULTI-FACTOR AUTHENTICATION**

Add an extra layer of security to your network management account.

#### **ROLE-BASED USER ACCESS**

Set granular permission levels for each user dashboard.

### **REMOTE MANAGEMENT**

#### **IN-APP TERMINAL**

Securely access any Telnet or SSH-enabled networked device—from anywhere.

#### **MULTI-FACTOR AUTHENTICATION**

Log into any device's web interface directly from your management dashboard.

### **PROACTIVE NETWORK MONITORING**

#### **ALERTS & NOTIFICATIONS**

Stay on top of important events on your client networks with preconfigured alerting that works out of the box. Customizable if desired.

#### **SERVICE MONITORING**

Inventory and monitor the services running on nearly any device.

#### **CONTEXT-AWARE DATA**

Get relevant and actionable information tailored to each device type.

#### **RICH STATISTICS**

Understand and improve the stability of your networks with usage and health stats.

#### **LIVE & HISTORIC DATA**

View network performance as it happens with 60-second polling, or dive into detailed logs.

### **TROUBLESHOOTING**

#### **NETWORK EVIDENCE**

Instantly know where a device has been seen across a network.

#### **DEBUG DATA**

All the technical debugging data you need, pooled in one easy-to-access location.

#### **CONFIGURATION MANAGEMENT**

Know exactly how devices are configured and when they change. Never miss a backup.

#### **CONFIGURATION RESTORE**

Instantly bring back any configuration from your version history.

#### **CONFIGURATION ANALYSIS**

Get suggestions for improving the performance and stability of your networks.
