

Aquatic Consultants Inc.

"Your Lake & Stream Experts"

June 1, 2020

As part of our normal monthly maintenance, our biologists and technicians visited the water resources at Deer Lakes HOA on the following date(s):

05/26/2020

Your lakes were assessed for aquatic vegetation problems, water quality was monitored, and overall lake condition evaluated. Following are the results of the monitoring and any subsequent treatments or management actions:

Trout Pond

May 26 - The previous treatment for water Knotweed was mostly successful with only a few patches that required a follow up treatment during this visit. Chara was treated successfully during the last visit and did not require a follow up. Thin bottom algae has begun to grow around the shoreline and was treated during this visit as well.

We will return in June to perform our scheduled lake management and maintenance. If you have any questions or concerns, please contact me at (505) 681-2500. Thank you again for your continued confidence in our company.

Sincerely,

Jake Shandler, Fisheries Biologist
