

Aquatic Consultants Inc.

"Your Lake & Stream Experts"

October 7, 2020

As part of our normal monthly maintenance, our biologists and technicians visited the water resources at Deer Lakes HOA on the following date(s):

09/25/2020

Your lakes were assessed for aquatic vegetation problems, water quality was monitored, and overall lake condition evaluated. Following are the results of the monitoring and any subsequent treatments or management actions:

Trout Pond

Sept 25 - Water level in this pond continues to drop drastically. Water smartweed is becoming established along the newly exposed shoreline. A aquatic treatment will be scheduled in the spring to help prevent this growth. Some bottom algae was present along the shoreline but not treated at the request of the client.

We will return in October to perform our scheduled lake management and maintenance. If you have any questions or concerns, please contact me at (505) 681-2500. Thank you again for your continued confidence in our company.

Sincerely,

Jake Shandler, Fisheries Biologist
