

## **Aquatic Consultants Inc.**

*"Your Lake & Stream Experts"*

September 5, 2020

As part of our normal monthly maintenance, our biologists and technicians visited the water resources at Deer Lakes HOA on the following date(s):

08/26/2020

Your lakes were assessed for aquatic vegetation problems, water quality was monitored, and overall lake condition evaluated. Following are the results of the monitoring and any subsequent treatments or management actions:

### **Trout Pond**

Aug 26 - The water level in this pond is extremely low allowing the smartweed to thrive on the exposed shoreline. Best treatment options is to wait until water level rises in the spring and treat it aquatically. A light treatment for bottom algae, chara, and the smart weed that was in water was administered during this visit.

We will return in September to perform our scheduled lake management and maintenance. If you have any questions or concerns, please contact me at (505) 681-2500. Thank you again for your continued confidence in our company.

Sincerely,

Jake Shandler, Fisheries Biologist  
Aquatic Consultants, Inc.
